

Third Quarter 2021
Earnings Presentation

November 4

### **Disclaimer**

#### **Forward-Looking Statements and Other Information**

This presentation contains statements reflecting our views about our future performance that constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including our fourth quarter and fiscal year 2021 guidance. In some cases, you can identify these statements by forward-looking words such as "may," "might," "will," "should," "expects," "outlook," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue," the negative of these terms and other comparable terminology. These forward-looking statements, which are subject to risks, uncertainties and assumptions about us, may include projections of our future financial performance, our anticipated growth strategies and anticipated trends in our business. These statements are only predictions based on our current expectations and projections about future events. There are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from the results, level of activity, performance or achievements expressed or implied by the forward-looking statements, including but not limited to the risk factors set forth in our most recent Annual Report on Form 10-K and in our Quarterly Reports on Form 10-Q.

For additional information on these and other factors that could cause our actual results to materially differ from those set forth herein, please see our filings with the Securities and Exchange Commission, including our most recent annual report on Form 10-K. Investors are cautioned not to place undue reliance on any such forward-looking statements, which speak only as of the date they are made. We undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.

#### **Non-GAAP Financial Measures**

We use non-GAAP financial measures "Adjusted EBITDA," "Adjusted Net Income," "Adjusted Earnings Per Share," "Net Debt" and "Adjusted Cash Flow From Operations" in evaluating our past results and future prospects. We define Adjusted EBITDA as net income calculated in accordance with GAAP, plus the sum of income tax expense, net interest expense, depreciation and amortization and further adjusted to exclude unrealized gains and losses on commodity derivatives and IPO and separation-related costs. We define Adjusted Net Income and Adjusted Earnings Per Share as Net Income and Earnings Per Share calculated in accordance with GAAP, plus the sum of IPO and separation-related costs, the impact of a tax legislation change under the CARES Act enacted March 27, 2020 and any unrealized gains or losses on commodity derivatives. We define Net Debt as the current portion of long-term debt less cash and cash equivalents. We define Adjusted Cash Flow From Operations as cash flow from operations adjusted for the change in related party receivables, change in related party payables, change in related party accrued interest payable, interest expense from related party borrowings and the repurchase of accounts receivable in conjunction with the IPO.

We present Adjusted EBITDA because it is a key measure used by our management team to evaluate our operating performance, generate future operating plans and make strategic decisions. In addition, our chief operating decision maker uses Adjusted EBITDA of each reportable segment to evaluate the operating performance of such segments. We use Adjusted Net Income and Adjusted Earnings Per Share as supplemental metrics to evaluate our business' performance in a way that also considers our ability to generate profit without the impact of certain items. We use Net Debt as we believe it is a more representative measure of our liquidity. We use Adjusted Cash Flow From Operations when evaluating our cash flow as it provides a more meaningful and comparable cash flow measure without the impact of certain related party items. Accordingly, we believe presenting these metrics provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management team and board of directors.

Non-GAAP information should be considered as supplemental in nature and is not meant to be considered in isolation or as a substitute for the related financial information prepared in accordance with GAAP. In addition, our non-GAAP financial measures may not be the same as or comparable to similar non-GAAP financial measures presented by other companies.

Guidance for the fourth quarter and fiscal year 2021, where adjusted, is provided on a non-GAAP basis, which the Company will continue to identify as it reports its future financial results. The Company cannot reconcile its expected Adjusted EBITDA to expected Net Income under "Fourth Quarter 2021 Guidance" and "Fiscal Year 2021 Guidance" without unreasonable effort because certain items that impact net income and other reconciling metrics are out of the Company's control and/or cannot be reasonably predicted at this time, which unavailable information could have a significant impact on the Company's GAAP financial results. In addition, the Company cannot reconcile its expected Net Debt to expected total debt without reasonable effort because certain items that impact total debt and other reconciling metrics are out of the Company's control and/or cannot be reasonable predicted at this time, which unavailable information could have a significant impact on the Company's GAAP financial results.

Please see reconciliations of Non-GAAP measures used in this presentation (with the exception of our fourth quarter and fiscal 2021 Adjusted EBITDA guidance and Net Debt guidance as described above) to the most directly comparable GAAP measures on the "Free cash flow profile" slide and in the appendix of this presentation.

**Performance Highlights** 

Net revenues increased 15%, 11 percentage points of which came from price increases with the remainder driven by a onetime sale of excess raw materials.

Adjusted EBITDA decreased 11%, as price increases lagged increases in material costs.

Net revenues increased 13%. driven by price increases and a 2% volume increase.

Adjusted EBITDA decreased 43%. as increases in material and labor costs outpaced price increases, partially offset by higher volume.

Net revenues increased 11%, driven by price increases, slightly offset by a 1% volume decline.

Adjusted EBITDA decreased 50%, as price increases lagged increases in material, labor and logistics costs.

Net revenues increased 2%, driven by price increases, partially offset by a volume decline of 4%.

Adjusted EBITDA decreased 42%, as price increases lagged increases in material, labor and logistics costs.
